

## Join us for an exciting opportunity to collaborate and share knowledge on remanufacturing

Rematec is proud to announce the launch of our first Rematec Masterclasses. We have teamed up with Trier University of Applied Sciences (G), Rotterdam University of Applied Science (NL) and BORG Automotive Group to bring you an exclusive program designed to facilitate cooperation between businesses and university students.

Starting on April 18th, 2023, students will attend a program made of unique lectures from experts in the field of remanufacturing.

Through dedicated queries provided by businesses, students will also gain experience in applying their skills and knowledge in remanufacturing. The program will run until the Rematec trade show on June 27 – 29, in Amsterdam, where students will have the opportunity to showcase their solutions in a designated area on the show floor. A panel of independent international experts will assess their solutions.

Businesses are invited to join these sessions by conducting masterclasses and submitting remanufacturing queries. Additional university student teams are also welcome to join the sessions. Don't miss out on this opportunity!

Contact Kim Buitelaar-Wollenberg (Exhibition Manager Rematec) via [rematec@rai.nl](mailto:rematec@rai.nl) for more information on how to join our Rematec Masterclasses.
