Welcome  
Bienvenue

## Free cooling of datacenters without mechanical cooling systems

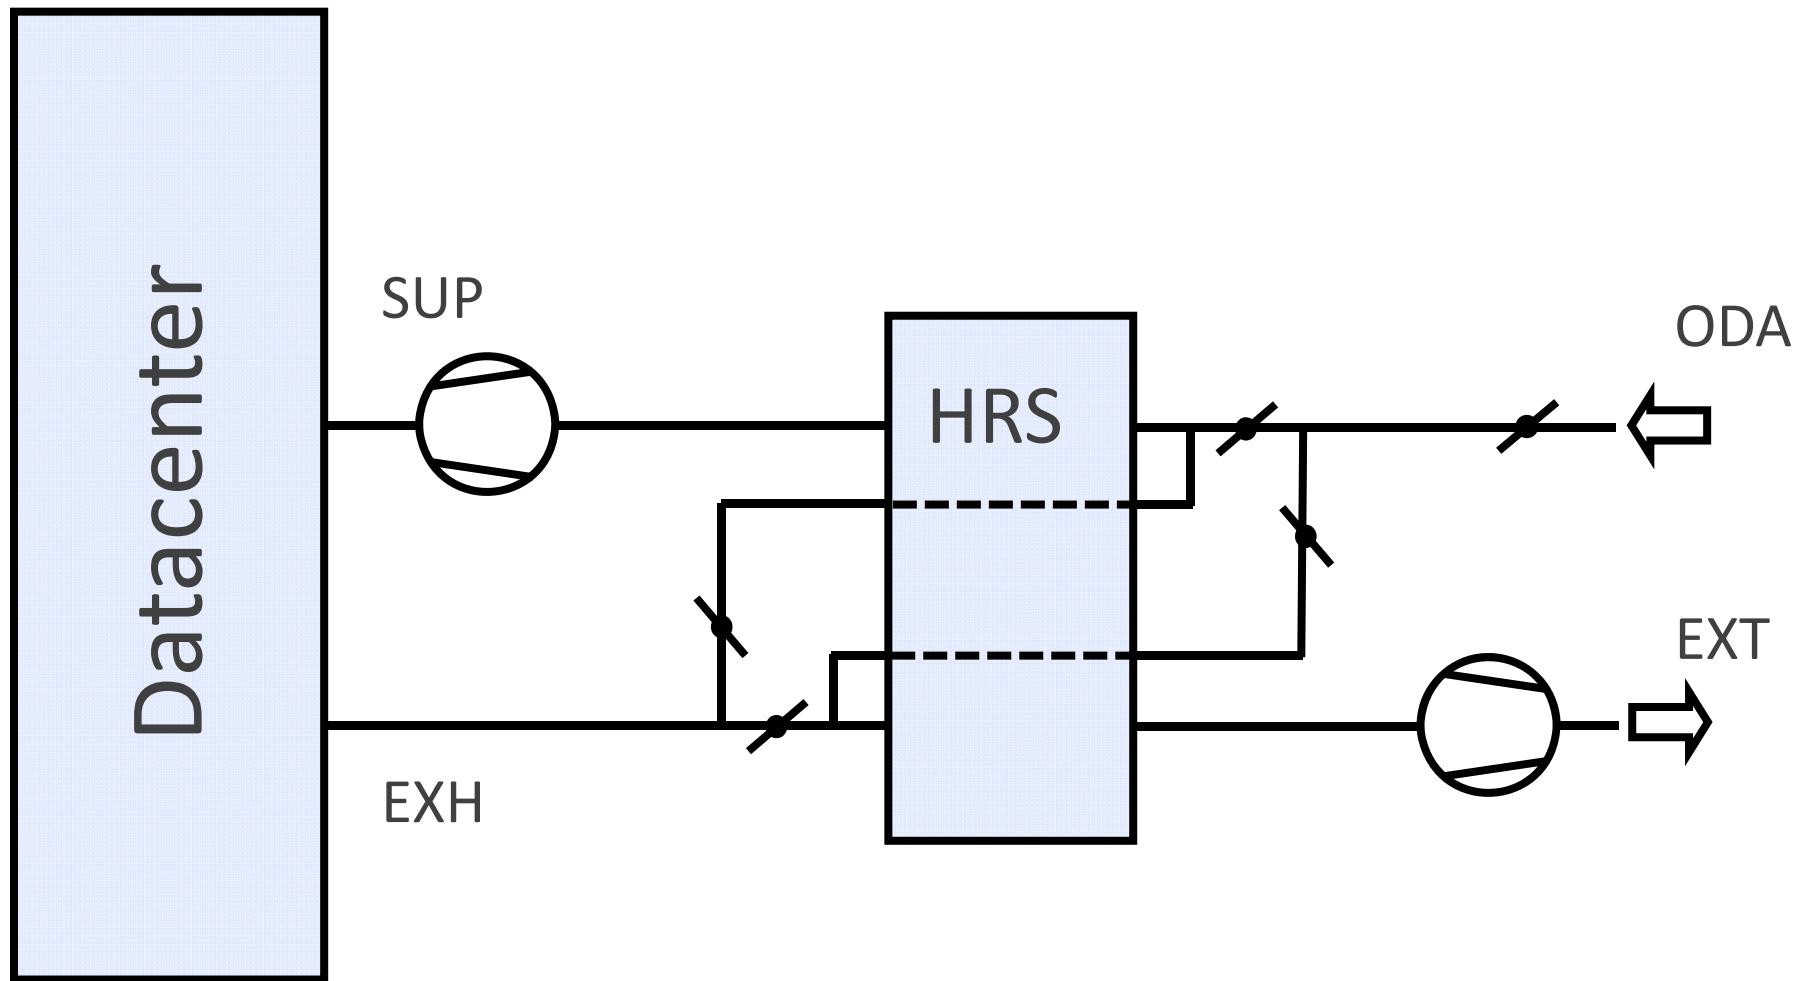

Prof. Dr.-Ing. Christoph Kaup  
[c.kaup@umwelt-campus.de](mailto:c.kaup@umwelt-campus.de)

# Targets

## Goals

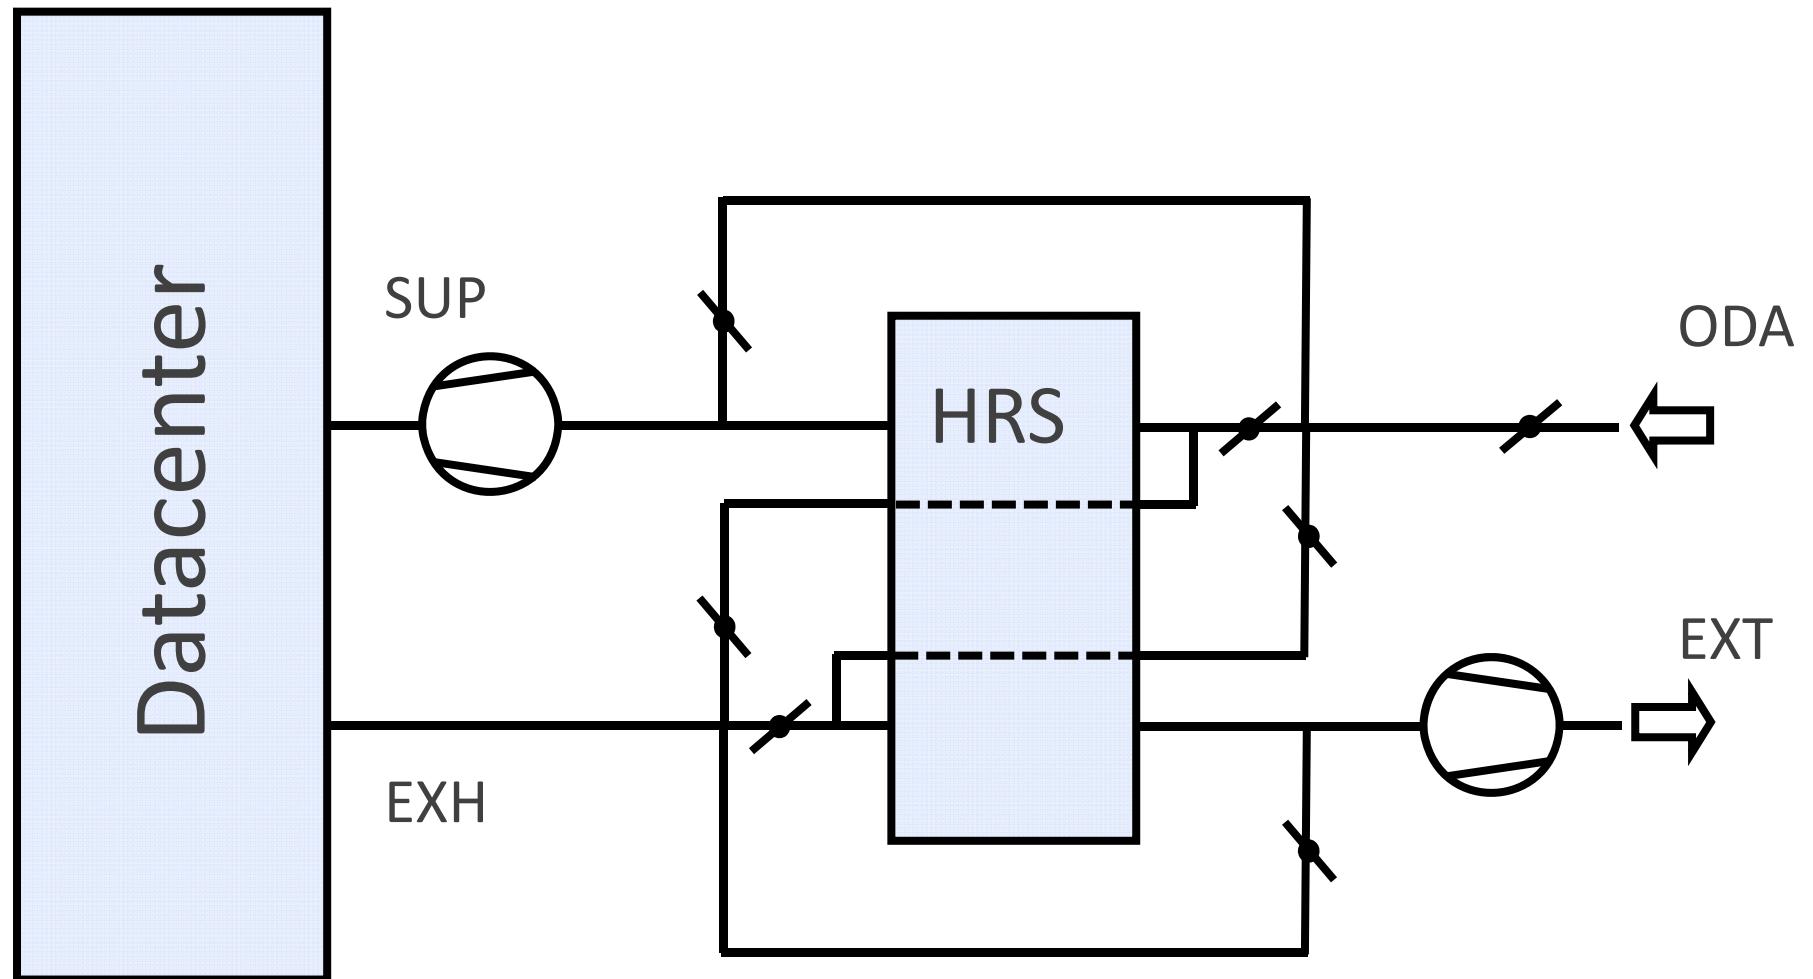

- Use of free cooling
  - ✓ direct free cooling, if outdoor air is clean
  - ✓ Indirect free cooling (decoupled by heat exchanger)
- Optimization of heat exchanger
  - ✓ High efficiency to maximize heat waste management
  - ✓ optimized indirect adiabatic cooling
- Optimization of temperatures
  - ✓ Adaption of cold- und warm zones
  - ✓ Control of indirect adiabatic cooling
  - ✓ Abdication of mechanical cooling

# Recooling of datacenters

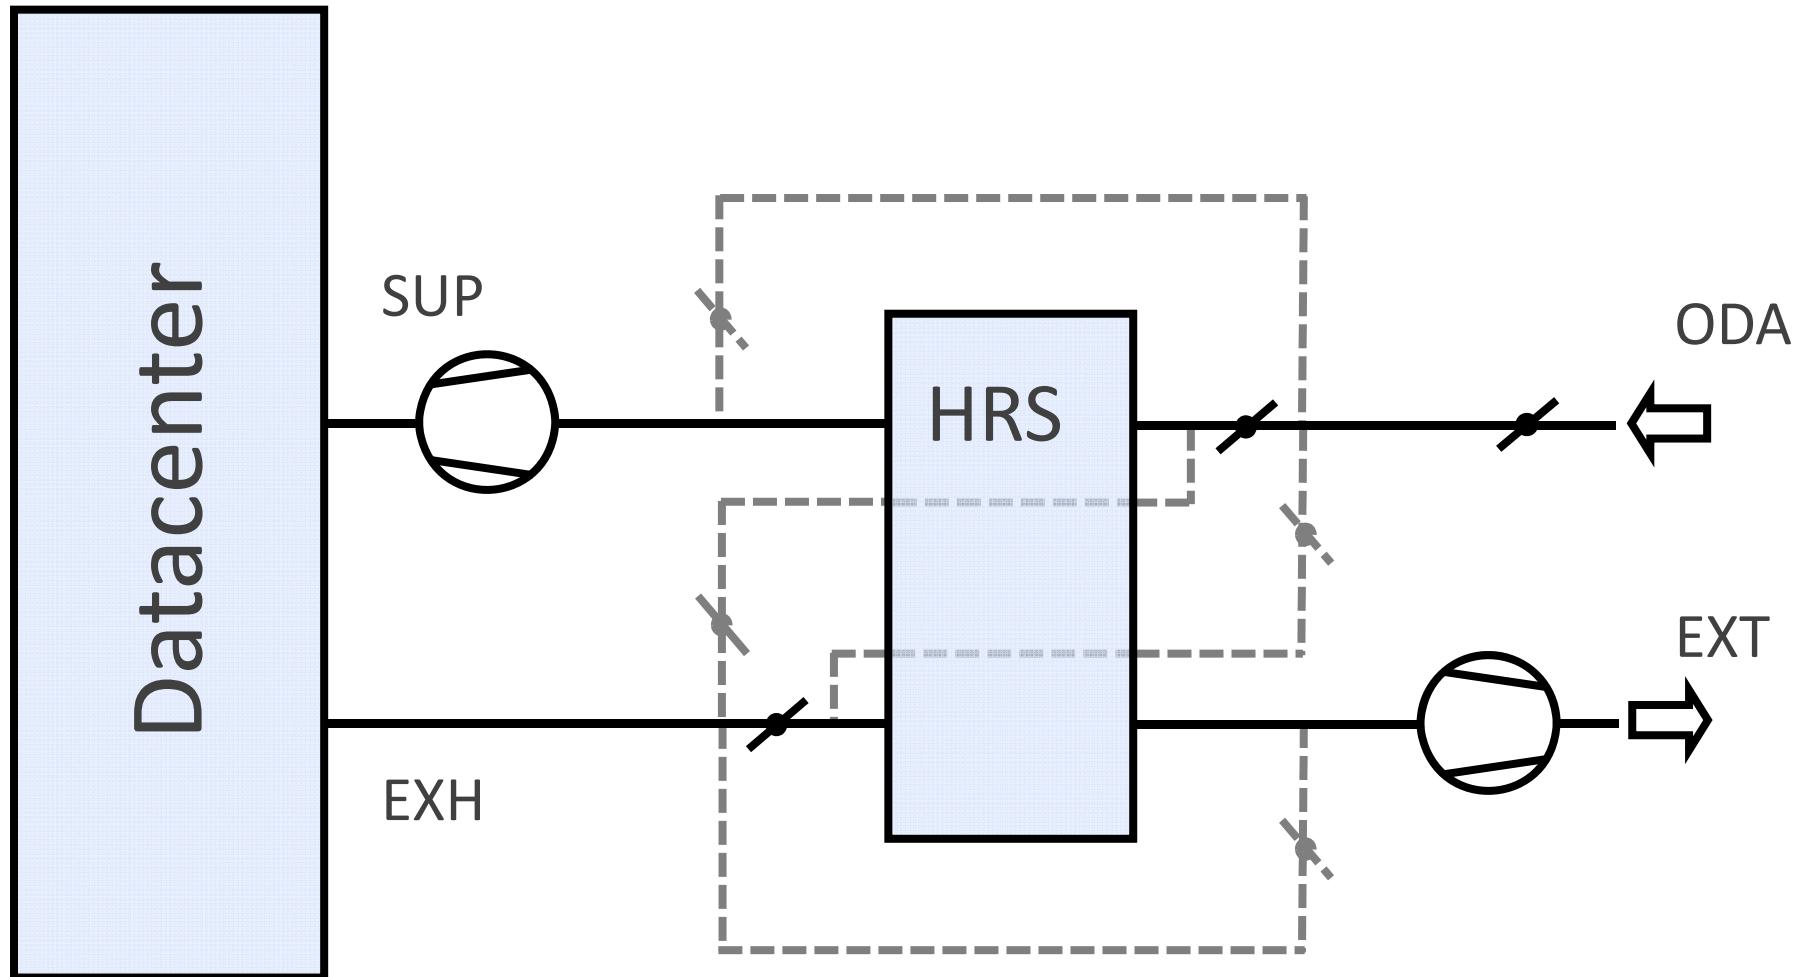

System concept

# Recooling of datacenters

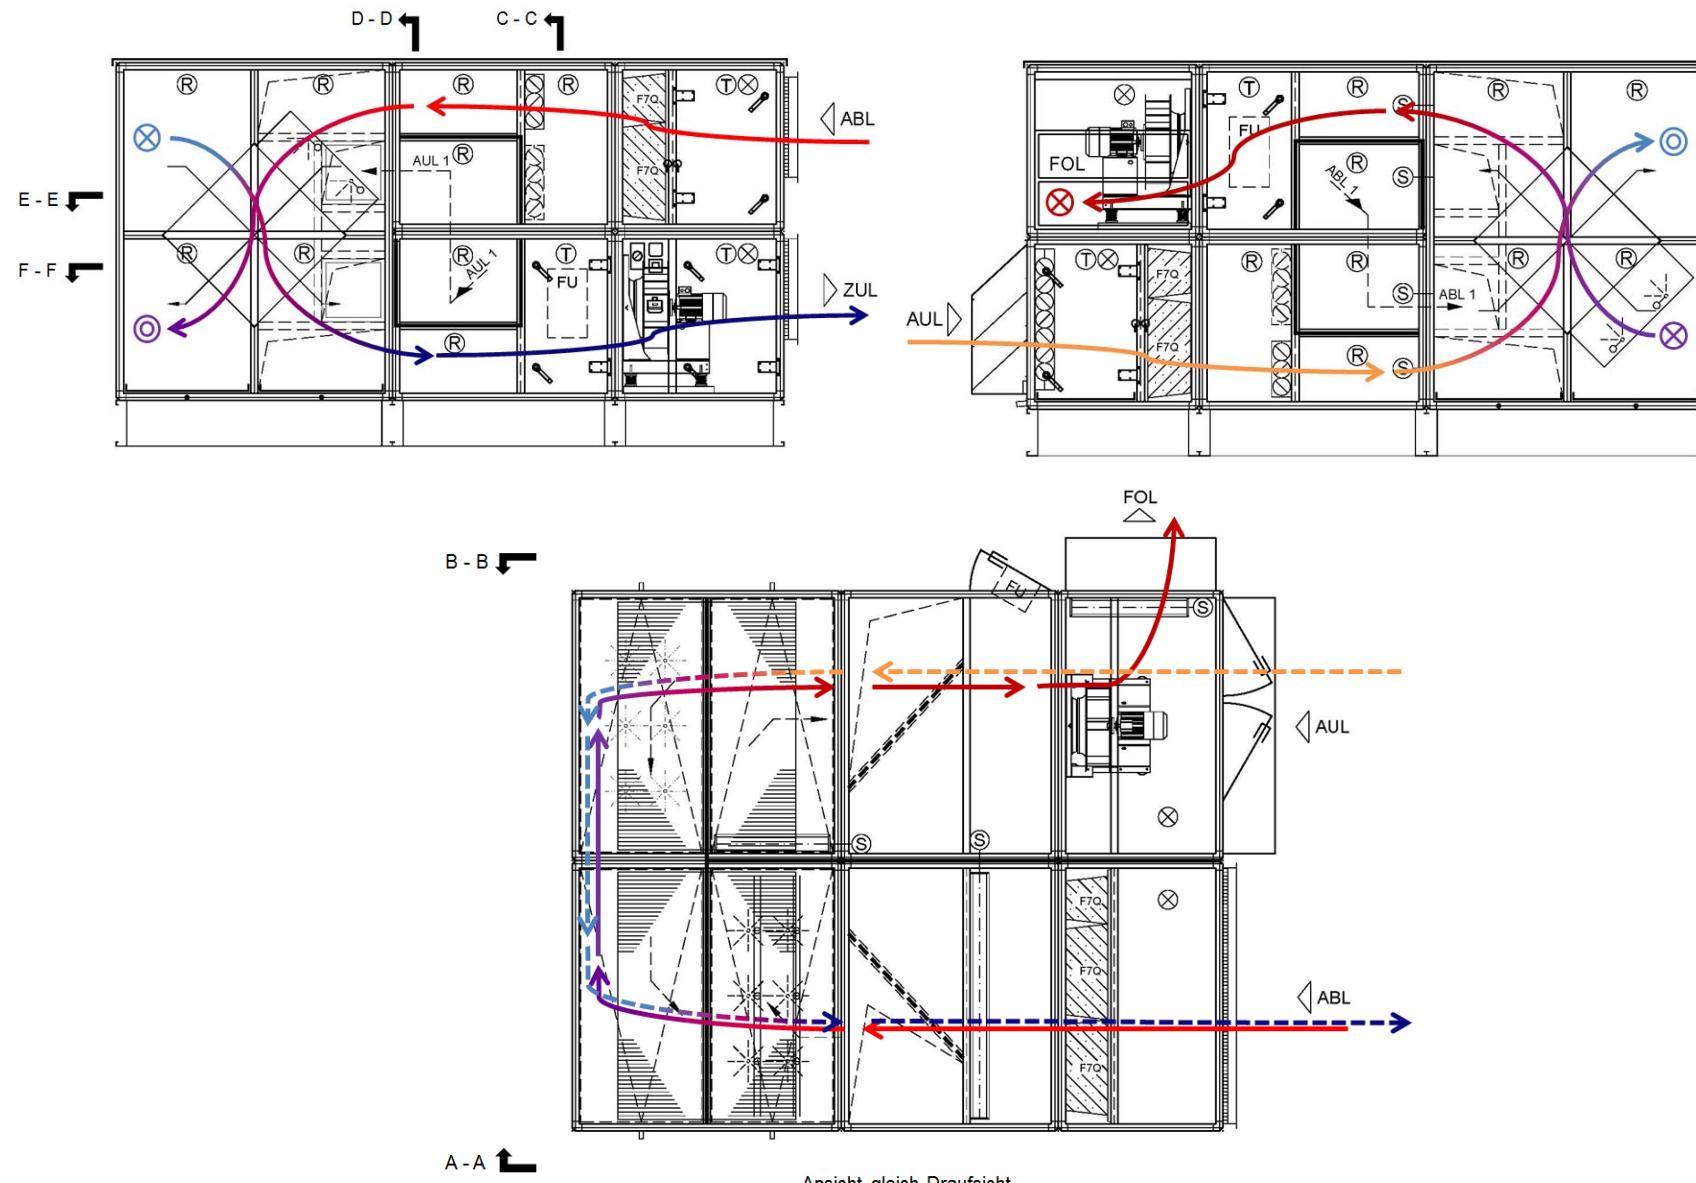

System concept with bypasses

# Recooling of datacenters

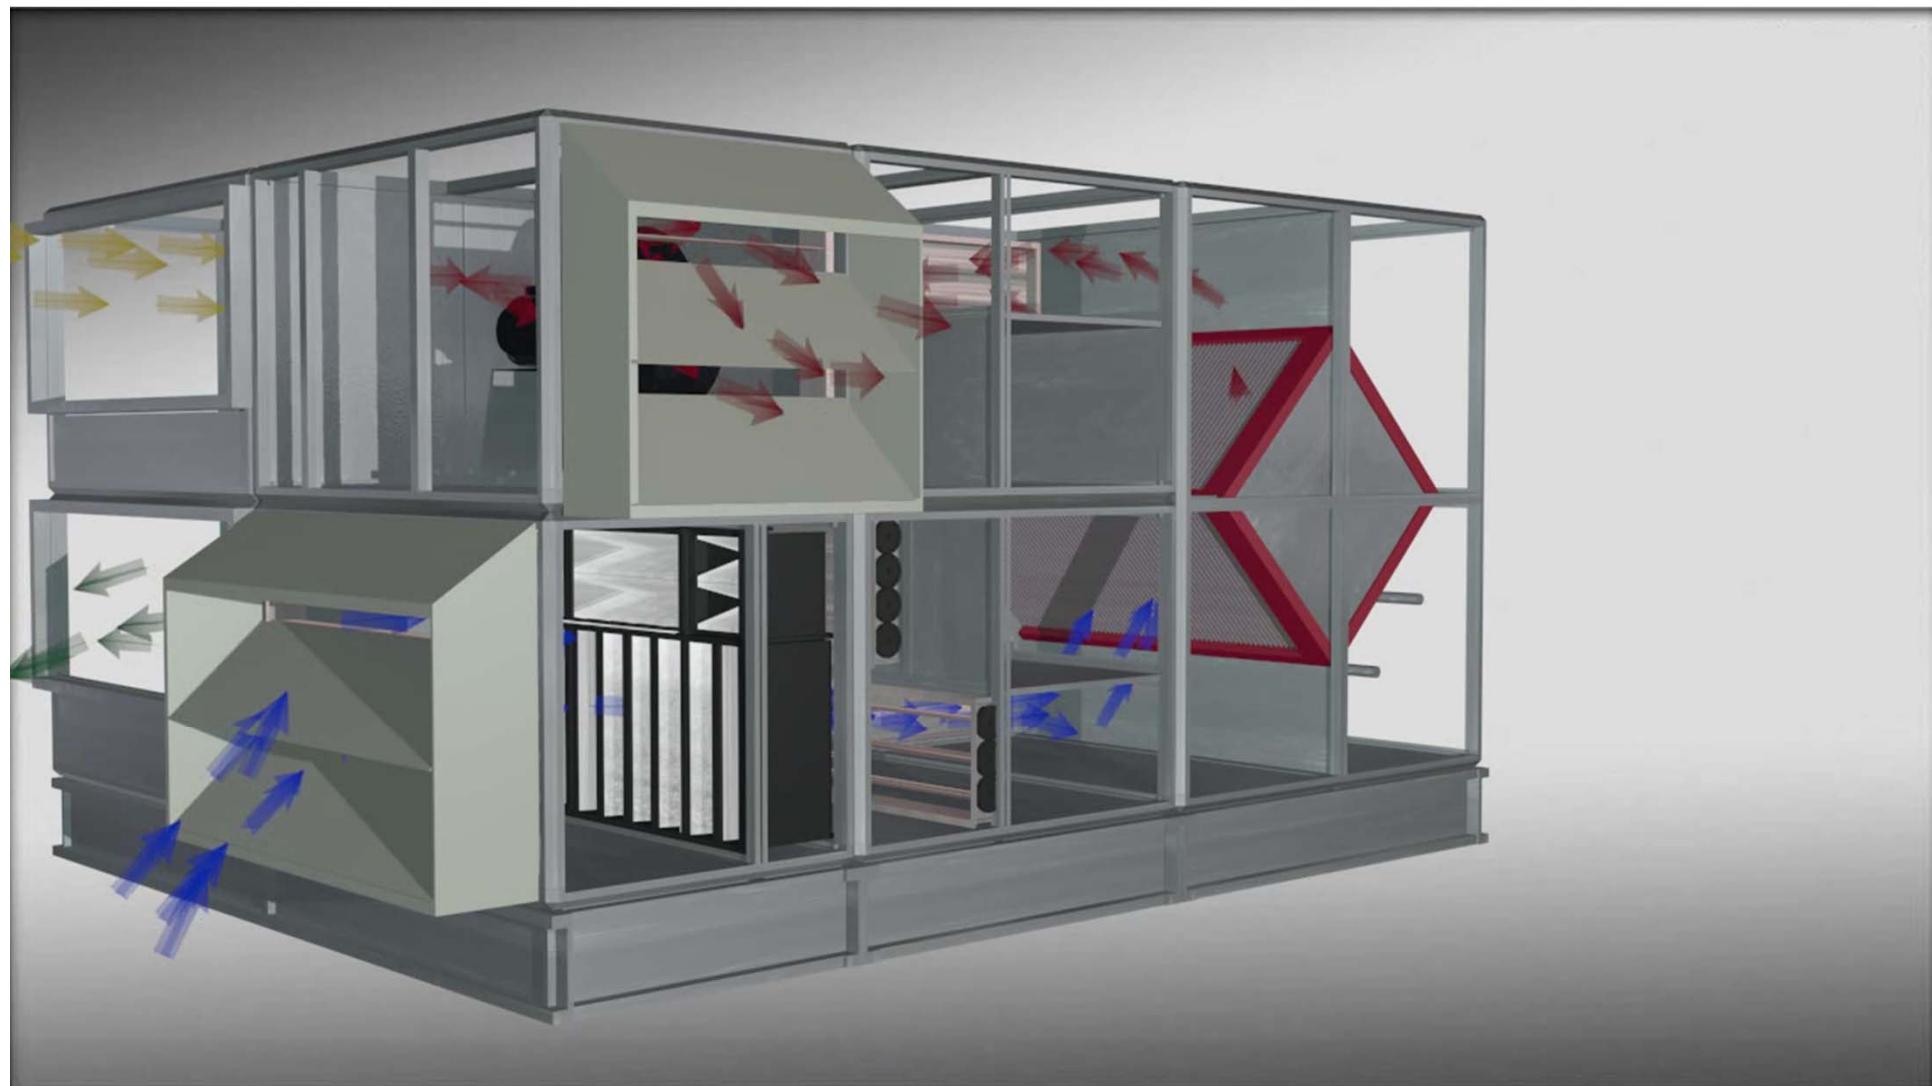

HRS operation (ODA-mode with direct free cooling) ODA – SUP / EXH - EXT

HRS operation (ODA-ODA mode with direct free cooling)

# Efficiency strategy

## Efficiency startegy

- Use of free cooling
  - ✓ direct free cooling, if outdoor air is clean
  - ✓ Indirect free cooling (decoupled by heat exchanger)
- Optimization of heat exchanger
  - ✓ High efficiency to maximize heat wast management
  - ✓ optimizied indirect adiabatic cooling
- Optimization of temperatures
  - ✓ Adaption of cold- und warm zones
  - ✓ Control of indirect adiabatic cooling
  - ✓ Abdication of mechanical cooling

Herzlichen Dank  
für Ihre  
Aufmerksamkeit

**Free cooling of datacenters without  
mechanical cooling systems**
